## Product Description

**Micro Primer PC-148** is used to improve adhesion and accelerate adhesion build-up of *Micro Clear Coatings* to various substrates.

**Micro Primer PC-148** improves adhesion to many substrates, provides stronger and more uniform bonds, is easy to use, and remains active for several hours after application.

**Micro Primer PC-148** also allows *Micro Clear Coatings* to be re-coated, which previously was not possible. This will allow a damaged coating to be touched-up without totally removing the coating and starting over.

Designed for use with *Micro Clear Coatings*, **Micro Primer PC-148** increases the opportunities for use and the substrates available to coat.

## Recommended uses for MICRO PRIMER PC-148:

-POWDER COATINGS  
-METALS  
-GLASS  
-PLASTIC

-OVER MICRO CLEAR TO RE-COAT  
-VINYL  
-INK SURFACES  
-PLEXI GLASS
